*The name RISC-V was chosen to represent the fifth major RISC ISA design from UC Berkeley (RISC-I ([Patterson & Séquin, 1981](#)), RISC-II ([Katevenis et al., 1983](#)), SOAR ([Ungar et al., 1984](#)), and SPUR ([Lee et al., 1989](#)) were the first four). We also pun on the use of the Roman numeral "V" to signify "variations" and "vectors", as support for a range of architecture research, including various data-parallel accelerators, is an explicit goal of the ISA design.*

Chapter 2. The Second Chapter

- 1. The first item.
- 2. The second item.
  - a. The first sub item.
  - b. The second sub item.

A moment of caution is required for this block of text must be read and apreciated for its importance.

- 3. Yet another item.
- 4. Again, an item.
  - a. A multi-line item.

This item has multiple lines.

By multiple lines, this is what we mean.

Seriously, multiple.

2.1. An example table
